YOUR MONEY BACK!

Dear Full Sound-Loving Friend,

If you're like me, there's a lot about your body and your health you take for granted.

You don't think much about your eyes until you start to squint and strain at a menu. You don't think much about your knees until they give way while climbing stairs and....

You don't think much about your ears until you find it hard to follow conversations when two or more people are talking or you find yourself always turning up the TV volume or avoiding phone conversations because so many words get muffled.

I know something about this because I'm one of roughly 30 to 50 million Americans who suffer from some form of hearing loss.

(continues on page 2. . .)

NO BIG DEAL, RIGHT? WRONG!

Trust me, if your hearing is patchy like mine is, it's easier to withdraw than to forge ahead with a plan for how to fix it. (More on the difficulty of getting help for the ear, in a minute) First, you should know...

Among older adults, loss of hearing can lead to poor job performance, loss of concentration, social embarrassment, isolation, depression and an increased risk of accidents. Trust me, hearing loss can adversely affect your life in many ways.

You can miss out on talks with family and friends. (THIS MIGHT BE A GOOD THING IF YOUR NEIGHBOR WANTS TO TELL YOU FOR THE SIXTH TIME ABOUT HIS HEMORRHOIDS, AND YOU HAD TROUBLE HEARING ABOUT IT ONE TIME!)

You can find it hard to hear what callers are saying over the phone. (THIS MIGHT BE A GOOD THING IF THE POLITICAL PARTY, NOT OF YOUR CHOICE, CALLS TO THANK YOU FOR GIVING MONEY WHEN YOU NEVER GAVE THEM A DIME AND NOW THEY WANT YOU TO COUGH UP \$500 FOR A CHANCE TO MEET A MAN YOU WOULD NEVER VOTE FOR!)

You can find it unnerving if you can't follow your own doctor's advice – UNLESS, OF COURSE, YOUR DOCTOR HAS NEVER GIVEN YOU GOOD ADVICE AND YOU'VE BEEN SHOPPING FOR A NEW ONE FOR MONTHS, BUT NOW...

For the first time, there's easy-does-it HELP for your hearing and mine.

It's called RECONNECT™, the new, powerful, all-natural way to hear again everything that's dear to you!

Before I tell you what makes RECONNECT superior to all other hearing formulas you may have tried, I want to share with you some things I've learned about hearing loss...

HOW DOES HEARING LOSS HAPPEN?

Most hearing loss occurs when the 15,000 tiny sensory hair cells in your inner ear (cochlea) become damaged, usually as a result of over-exposure to loud sounds, a serious infection, a genetic disorder or decreased circulation due to aging.

These hair cells are needed to convert sound waves into electrical impulses that are then sent via the auditory nerve to your brain.

To be heard, sounds must exert a shearing force on the hair cells lining the membrane of the cochlea.

When excessive, this force can lead to cellular overload, cell damage and cell death. (NOT GOOD!)

Concurrent exposure to solvents and heavy metals may increase the damage already caused by excessive noise.

BUT NOISE IS NOT THE ONLY HEARING LOSS CULPRIT..

Middle ear infections and inflammation, viral or bacterial infections, heart disease, head injuries, tumors, certain medicines, and excessive stress are also common ways that you can lose your hearing. (My hearing loss was due to an inner ear infection from about 25 years ago that was later made worse by a neck injury!)

HEARING LOSS IS MORE COMMON IN MEN THAN IN WOMEN.

Hearing loss is a problem that crosses all barriers including gender, race, income, but problems do strike men more frequently than women.

No one knows why this is the case except that men also have a much higher rate of high cholesterol, high blood pressure and heart disease than women.

If you have circulatory blockages, it stands to reason the blood flow to your ears might not be as consistently robust as it needs to be.

Still, most men (including me) just say, if it's broke I'll go to the doctor (called an otolaryngologist) and get a hearing tune-up or overhaul. NOT SO FAST.

I'VE SEEN SIX DIFFERENT SPECIALISTS AND I CAN TELL YOU THIS: AFTER UNDERGOING HEARING TESTS IN WHICH THEY PUT YOU IN A LITTLE SOUND STUDIO WITH HEADPHONES AND DING YOU IN ONE EAR, THEN THE OTHER, AFTER THE BRAIN SCANS, AFTER THE DIARECTIC PILLS, CHANCES ARE YOU WON'T HAVE ANYTHING FIXED. BUT YOU WILL HAVE RUN UP BILLS IN EXCESS OF \$5000!

THE SOBERING REALITY IS THIS: Only 5% of hearing loss in adults can be improved through medical or surgical treatment. Even so, most older Americans will not take advantage of hearing aids. Why?

(continues on page 4. . .)

Many people think hearing aids make them look older than they are. But another HUGE barrier is cost: a pair of hearing aids can cost \$5,000 and none of that is covered by insurance. Hearing aids, cochlear implants, surgery – they cost thousands of dollars and often come with high risk and NO CERTAINTY OF SUCCESS!

What's the answer to this ever-increasing hearing loss problem that's super expensive to repair and comes with uncertain results – especially for people over 65?

WAKE UP YOUR HEARING WITH RECONNECT™

RECONNECT is the 100% natural way to MINIMIZE OR ELIMINATE ringing, whistling, roaring, hissing, chirping, buzzing, and cricket sounds in your ears.

This proprietary formula is fully anchored in clinical studies and approved by Dr. Devin Mikles, M.D., Director of the Choices Integrative Healthcare of Sedona, to promote the health of the ear and to help prevent additional hearing loss, or in some cases restore hearing.

WITH RECONNECT, your hearing restoration is accomplished in two ways.

The first way is, RECONNECT promotes the health of your circulatory system. The second way is, RECONNECT provides the super nutrient and antioxidant support that your inner ear needs to repair, rebuild and renew itself.

Lots of other hearing formulas promise a broad range of ingredients, but there are none like RECONNECT that contain such a powerhouse spectrum of amino acids, vitamins, minerals, herbs and antioxidants – 15 targeted super nutrients in all.

No two ways about it, RECONNECT is the Rolls Royce of hearing formulas and here's 15 reasons why there's nothing else like it anywhere....

RECONNECT REASON #1! RECONNECT contains Acetyl L-Carnitine that shows great promise in not just protecting the ear from noise-induced hearing loss, but has been shown, in repeated studies, to reverse the damage caused by antibiotics. When Acetyl L-Carnitine was given to pregnant mice, the incidence of hearing loss were greatly reduced.

RECONNECT REASON #2! RECONNECT contains Alpha Lipoic Acid (or ALA) the only antioxidant that's both fat and water soluble, which means it can scavenge free radicals anywhere in the body – including your ears. ALA is a

co-enzyme meaning that it interacts with Vitamin E & C, by helping to “recycle” them and maximize their usefulness to your body.

RECONNECT™ REASON #3! RECONNECT contains Biotin that's essential for the metabolism of carbohydrates, fats and amino acids. It also helps lower blood glucose levels which lowers insulin requirements which, in turn, lowers heart stress. Biotin is believed to promote cell growth in key areas including the auditory canals.

RECONNECT REASON #4! RECONNECT contains Bromelain, a proteolytic enzyme from pineapples. As a proven anti-inflammatory, bromelain helps improve hearing by decreasing the swelling of the mucus membranes.

RECONNECT REASON #5! RECONNECT contains Butcher's Broom, an herb approved by the German E Commission for the treatment of hemorrhoids and varicose veins. It's also extremely useful for carpal tunnel syndrome, circulatory disorders, edema, and vertigo.

RECONNECT REASON #6! RECONNECT contains Cayenne which has been shown to strengthen the heart and circulatory system and remove plaque build up inside arteries. Hands down, it's the single best herb for improving circulation throughout your body – including the auditory canal.

RECONNECT REASON #7! RECONNECT contains Folate, also known as folic acid. Folate is considered a brain food and you need it for energy production and the formation of red blood cells. In a study from the Netherlands, participants that took folic acid showed significantly less hearing loss than those who took the placebo.

RECONNECT REASON #8! RECONNECT contains Ginkgo Biloba, an herb with powerful antioxidant benefits that enhances brain, retina and cardiovascular function. It is well known for its ability to improve circulation. Numerous studies indicate it can improve both long and short term memory, enhance concentration and improve hearing function

RECONNECT REASON #9! RECONNECT contains Horse Chestnut that's been shown to provide relief for inflammation of joints, tendons, and muscles. It helps improve ear function by reducing excess fluids associated with ringing, vertigo and hearing loss.

RECONNECT REASON #10! RECONNECT contains Magnesium that's vital for every organ in the body, particularly the heart, muscles and kidneys. It activates enzymes, contributes to energy production and helps regulate calcium levels as well as copper, zinc, potassium, vitamin D and other important nutrients and it helps restore noise-related hearing loss.

(continues on page 6. . .)

RECONNECT REASON #11! RECONNECT contains N-acetyl Cysteine (NAC) that helps break down mucus and detoxify harmful substances in the body. You need it to produce the free radical fighter glutathione and to help maintain it at adequate levels in your cells. NAC has a number of health benefits that have been verified by scientific studies including the improvement of noise-induced hearing loss.

RECONNECT REASON #12! RECONNECT contains Niacin, also known as Vitamin B3. You need niacin for the proper function of more than 50 enzymes. Without niacin, your body would not be able to release energy or make fat. Not only is niacin effective in the treatment of high cholesterol, but it's also proving beneficial in the treatment of other health concerns such as tinnitus or ringing of the ears.

RECONNECT REASON #13! RECONNECT contains Red Peony Root that's used in Traditional Chinese Medicine to remove heat from blood, to eliminate blood stasis and to relieve pain. It's regarded as a general health tonic to strengthen the body and improve circulation.

RECONNECT REASON #14! RECONNECT contains Gui Zhi/Cassia that's often called Chinese cinnamon. This herb is widely used for its anti-clotting actions, its anti-microbial activity, for its ability to control blood sugar levels, boost brain function and increase circulation.

RECONNECT REASON #15! RECONNECT contains Chuan Xiong that's used in Traditional Chinese Medicine to invigorate circulation. It's proven especially useful for treating stagnant qi(chi) and blood in the head, chest, flanks and abdomen. Helps relieve headaches and dizziness.

- BETTER sound volume for the sounds you want to hear
- BETTER brain function and mental clarity
- BETTER overall circulation and heart function
- BEST OF ALL, less ringing and buzzing
